1. The previous restriction requirement contained an error with respect to the grouping of claims 13 and 14. The previous restriction requirement is withdrawn in view of the following new restriction requirement.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 13 and 14, drawn to compositions, classified in class 536, subclass 23.1 and 23.5 and class 514, subclass 44.
 - II. Claims 7-12, 15-25, drawn to methods of targeted mutagenesis, classified in class 435, subclass 6 and class 514, subclass 44.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP ' 806.05(h)). In the instant case, the claimed product can be used in a materially different process such as for a probe in *in vivo* or *in vitro* nucleic acid detection methods.
4. Because these inventions are distinct for the reasons given above and have acquired a different status in the art as demonstrated by their divergent subject matter and because inventions I and II require different database searches, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
